6. We developed a polemical statement for the philosophy and heresy of determinism which goes as follows:

This is the devil's world (your environment) and man is a fallen creature (your genetics). You will conform to the norms and standards of your environment and submit to the flaws of your genetics if your volition does not respond to the influence and accept the restraint of divine thought.

7. Consequently, your volition is free to reject the love of God as it is expressed in the grace of God.
8. On the other hand, you can use your free will, your God-given self-determination, to willingly pursue truth, serve God, and ride the crest of the wave of history which He desires for you
9. The choice is yours. Which way will you choose? You've got everything to gain; you've got everything to lose.
