

The Inscrutable Question: Review: The Production of Integrity & Honor: Five Formulas; Christian Integrity Plus Loyalty to Doctrine Produces Honor

IV. The Production of Integrity & Honor: Five Formulas:

Formula #1:

$$\mathbf{F/HS} + \frac{\mathbf{GAP}}{\mathbf{PV}} = \mathbf{BD/SOC} \rightarrow \mathbf{PSOD}$$

The filling of the Holy Spirit (F/HS) plus positive volition (PV) under submission to the grace apparatus for perception (GAP) equals Bible doctrine resident in the stream of consciousness (BD/SOC). Through consistent spiritual growth this eventually produces (→) a personal sense of destiny (PSOD).

NOTE: Once the believer acquires a personal sense of destiny he encounters a series of tests designed to accelerate his spiritual growth and prepare him for evidence testing.

Formula #2:

$$\mathbf{BD/SOC} \rightarrow \mathbf{SSE} + \frac{\mathbf{PPS}}{\mathbf{LD/CSC}} = \mathbf{SA}$$

Bible doctrine resident in the stream of consciousness (BD/SOC) produces (→) spiritual self-esteem (SSE). When spiritual self-esteem is placed under the pressure of providential preventive suffering (PPS) and the believer responds by being loyal to doctrine (LD) by means of cognitive self-confidence (CSC) it results in spiritual autonomy (SA) and he becomes spiritually self-sustaining.

NOTE: Loyalty is defined as a faithfulness that is steadfast in the face of any temptation to renounce, desert, or betray its norms and standards. Biblical norms and standards provide guidance to the believer in resolving the tests encountered during suffering for blessing. They counsel restraint on the one hand and grant permission to act on the other.

Formula #3:

$$\mathbf{BD/SOC} \rightarrow \mathbf{SA} + \frac{\mathbf{MT4}}{\mathbf{LD/CIND}} = \mathbf{SM}$$

Bible doctrine in the stream of consciousness (BD/SOC) produces (→) spiritual autonomy (SA) which will eventually be placed under the pressure of momentum testing in four categories (MT4). If the believer maintains loyalty to doctrine (LD) by means of cognitive independence (CIND), he will advance to the level of spiritual maturity (SM).

NOTE: We have studied the four categories of momentum testing: (1) people; (2) thought; (3) system; and (4) disaster.

Formula #4:

$$\mathbf{BD/SOC} \rightarrow \mathbf{SM} + \frac{\mathbf{ET2}}{\mathbf{LD/CINV}} = \mathbf{MGG}$$

Bible doctrine in the stream of consciousness (BD/SOC) produces (—>) spiritual maturity (SM) which qualifies the believer to be cross-examined by Lucifer in the appeal trial. This believer has the privilege of testifying before the court by demonstrating that even when under maximum pressure he will remain loyal to God and His Word. This pressure is called evidence testing and it can be allowed by God under two categories (ET2): the relationship-with- God test or the relationship-with-life-and-circumstances test. When under evidence testing the believer maintains loyalty to doctrine (LD) by means of cognitive invincibility (CINV), he glorifies God to the maximum (MGG).

NOTE: In each of the first four formulas, Bible doctrine circulating in the stream of consciousness is the catalyst that produces ascending levels of Christian Integrity.

Christian integrity is illustrated in the formulas by the principle of remaining loyal to doctrine by means of certain levels of spiritual intelligence. The believer who knows doctrine and is loyal to it under pressure has Christian integrity. Christian integrity is recognized by God and often by others as the virtue of honor. All these levels of pressure and virtue can be summarized by means of a fifth formula:

Formula #5:

$$\text{BD/SOC} \rightarrow \text{CI} \quad \begin{array}{c} \text{Pr} \\ + \end{array} \quad \text{LD} = \text{H}$$

Bible doctrine in the stream of consciousness (BD/SOC) of an adult believer produces (—>) advancing levels of Christian integrity (CI). When a believer with Christian integrity is placed under pressure (Pr) and maintains his loyalty to doctrine (LD), he becomes a person of honor (H).

NOTE: Such a believer is transformed into a vessel of honor by means of the inculcation of God's thinking into his stream of consciousness according to Romans 9:21. His stream of consciousness is clothed in an invisible uniform of honor where Jesus Christ is said to be "at home" according to Ephesians 3:17. This believer's uniform of honor is parlayed into a uniform of glory as a part of the fifth Nike Award at the Judgment Seat of Christ according to Revelation 3:5.

- 1- The development of integrity in the soul of the believer is the resource from which honor is produced. The reward for this loyalty under pressure is escrow blessings in time and eternity.
- 2- This is how the believer glorifies God. He is able to verify the veracity of the Word of God by using its power under pressure. Loyalty through suffering is how the believer is able to please God Who in turn is pleased to bless the believer.
- 3- This is the ultimate expression of reciprocal love by the believer and the ultimate expression of its acknowledgement by God the Father.
- 4- When there are a certain number of such believers in a client nation, that nation is protected by the sovereignty of God and the omnipotence of Jesus Christ who controls history.
- 5- If the Fifth Cycle is to be avoided we must join those who dress their souls with the uniform of glory. The way by which this is accomplished is to continue your advance in the plan of God so that you can execute the sophisticated spiritual life.
- 6- Those who accumulate the wisdom and knowledge of divine thought become believers of honor. They are true patriots for it is their advanced inventory of divine thought that allows the Lord to reinstall the wall of fire that protects our client nation from assaults by predator nations.
- 7- The humility of believers who possess divine thought results in a desire to honor God through acts of reciprocal love. There are a number of examples among the kings of Israel—King Solomon will be our example.
